

Introducing the All-New

The Excision Ebox is an innovative solution for storing and dispensing oil and metalworking fluids safely, easily and efficiently. It's better than any drum.

✓ Hassle-Free Disposal

✓ Easy Handling

✓ Extended Shelf-Life

Better than a Drum

Same great range In a box

What makes the Ebox unique?

The Excision Ebox is a hassle-free way to store and dispense oil and metalworking fluids. Its square shape and built-in handle make it easy to store and carry, while its fully sealed interior ensures that the oil is always protected from contaminants. Disposal is hassle-free with the cardboard box, making it easy to take apart and recycle, reducing landfill by up to 90%.*

Save On Disposal

Constructed from recyclable cardboard and reduced levels of hard plastic, the Ebox makes for significant cost savings in disposal.

Extended Shelf Life

The Ebox offers extended shelf life by being fully sealed and protected until empty, ensuring it is always free from contaminants.

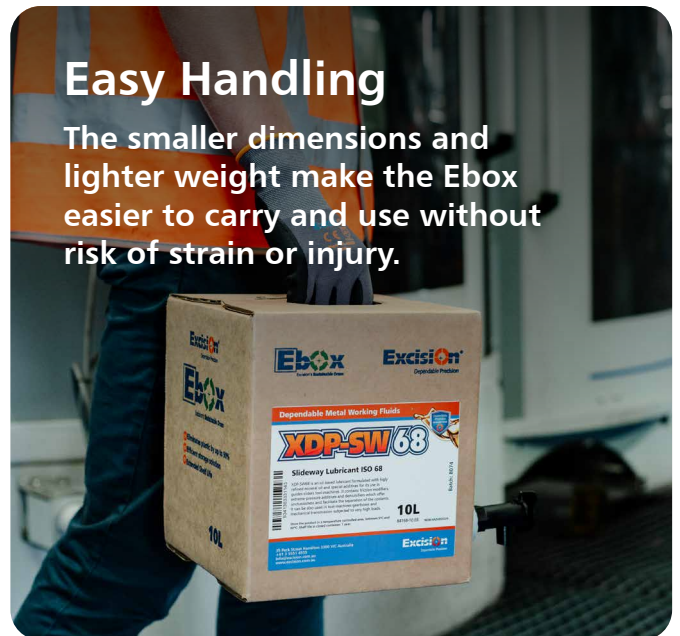

90% Less Plastic

The Ebox uses up to 90% less plastic than other oil drums of the same capacity, making it more sustainable and environmentally responsible.*

Easy Handling

The smaller dimensions and lighter weight make the Ebox easier to carry and use without risk of strain or injury.

*Based on analysis comparing Ebox to a standard HDPE container. Findings show a reduction of 90.6% in plastic weight (excluding lids) and 89.8% (including lids), along with a 99.2% reduction in plastic volume for disposal.
